

# K/KP SERIES

## Coils and Chokes for general use

### High intensity inductance

Series of coiled inductors over a ferrite core with a wide range of saturation currents. They are specially recommended to be used in switched mode power supplies, RFI filters and pretuned circuits. Two models are available: the K series, without sheathing, and the KP series, sheathed.

The KP series presents a specially high resistance against humidity because its is sheathed in epoxy.

### Features

- Approximate weight: Series K: 30 gr.; Series KP: 45 gr. Max.
- High reliability.
- Wide current range.
- Core material: ferrite.
- Operating temperature: -20°C to +80°C.

Code	L $\pm 20\%$ F=1 KHz	RDC MAX. ( $\Omega$ ) 20°C	IDC MAX. (A)	S.R.F. (MHz) MIN.
